Quick Tips: Playing a DVD Disc with VLC Media Player

To use VLC media player:

1. Select Programs from Start menu.
2. Select VideoLAN and select the VLC media player.
3. Select the Open Disc option from the Media menu.
4. Select the Disc tab and check DVD.
5. In the Disc Device box, by default, the path for the disc is displayed. You may select a different path using the Browse button.
6. Click on the Eject button. The disk drive opens automatically and you can check if the drive is empty or if the correct disc is in the drive.
7. When the DVD is played, the entire disc need not be played. To specify the part to be played, specify the Title and Chapter number in the Starting Position box.
8. Under the Audio and Subtitles group, select the Subtitles track and Audio track.
9. When you’re done with your selections, press Play.
